

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV trip. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

Whilst on their trip, John spent time talking to former business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered an infinite market for a product that could promptly and safely elevate individuals in the air to accomplish maintenance and other construction services.

After returning from their holiday, John set up a partnership with two of his friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design essentials of that original lift into existing models.

JLG forklifts have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into numerous markets worldwide and develops new products to make certain consumers are capable of being more effective and perform in the workplace within a safer atmosphere.
